

Music Intent

“Music, worldwide, is heard in almost every part of our lives and is one of the highest forms of creativity”

We are building a new or developing an already fond appreciation for music and developing our talents as and skills as musicians. Through each lesson we learn not only what is being taught, but apply the knowledge through practical music to gain a deeper, meaningful understanding.

Music is separated into three disciplines
PERFORMING - COMPOSING - LISTENING

As students in music we aim to foster each of these disciplines so that we can aim to build personal skills that we draw upon to succeed, not only in music but also beyond school life in future employment.

With the opportunities to have music in school we aim to develop our own practical aspects of performance and composition to help root life skills such as confidence, self-awareness, perseverance, discipline, team work, organisation, social skills, time management and a sense of achievement.
